PROFILE

16 years in the display industry at InnoLux and 70+ projects, specializing in turning panel and touch technologies into working prototypes. Promoted to Assistant Manager in 2014; led a 3-person team (hardware, firmware, software). See my portfolio for details.

SKILLS

SOFTWARE

- Android apps (Java)
- AI models (TF / PyTorch)
- Computer vision (YOLO / OpenCV)

HARDWARE

- Industrial / mechanical design
- System integration

EDUCATION

MASTER OF SCIENCE

National Cheng Kung University 2007-2009

BACHELOR OF SCIENCE

National Kaohsiung Normal University 2003-2007

EXPERIENCE

ASSISTANT MANAGER

InnoLux 2014 - Present

Responsibilities

- Led a 3-person team on a multi-payment terminal and an AI truck e-mirror.
- Designed and built prototypes from hardware to software, ensuring usability, stability and demo impact.
- Integrated new technologies (Mini-LED, IoT, machine learning) and refined prototype UIs for customers.
- Delivered 8-12 projects a year; prototypes demoed to 30+ customers worldwide annually.

OUTSOURCING

InnoLux 2012 - 2014

- Managed panel and touch process outsourcing vendors.

PANEL PACKAGE DESIGN

InnoLux 2010 - 2012

- Designed TFT-LCD panel transport packaging.

AWARDS

2025 SID People's Choice Awards

2024 Gold Panel Award

2023 Go Next Digital, Gold

2022 AI Academy, 1st Place

2020-26 Taiwan Excellence x5

PROJECT

This 7.3-inch color e-paper frame has two parts: the frame itself and a phone app. After an update, the frame enters sleep mode after 2 minutes of inactivity to save power, and runs for about half a year on a full charge. The app manages multiple frames at once and updates content in one tap, which suits home photo frames as well as desktop signs for small shops.

MY ROLE

SOFTWARE

UI/UX designed in Figma; Android app built in Java, covering BLE and HTTP transfer and dithering for the e-paper display.

HARDWARE

ESP32-S3 main MCU with a power-management IC and Li-ion battery, USB Type-C charging and a slim PCB. Equal-width bezels and a wooden stand keep the display at its best in portrait or landscape.

FIRMWARE

BLE / Wi-Fi connection switching, low-power MCU modes and e-paper driver integration.
